Housekeeping

Project Timeline

- Only 5 weeks left! 3 groups have been IRB...
- By the end of today, everyone will be
- If you get 100 people, start analyzing (collecting)
- Front ends should be done! Keep pra

What's Next?

Week 13 **Writing the Research Report**
11/17

Woohoo! You've analyzed your data and interpreted the results. Now it is time to write up your findings into a complete research report. We will discuss what to include in the background, methods, results, and discussion sections of a quantitative research article, including providing implications of your work and future directions. We want you to write your work in a way that demonstrates that you implemented your method well and make a sound contribution to the field of psychology scholarship and theory.

Workshop Topic: Hypothesis Testing and Writing Results

We will walk through inferential tests relevant to their studies (e.g., t-tests, ANOVA, regression) using sample data. Students will also practice writing the Results section in APA style for various statistical tests.

Readings

*Gliner, J. A., Morgan, G. A., & Leech, N. L. (2017). *Research methods in applied behavior analysis: An integrated approach to design and analysis* (3rd ed.). Routledge. *Required reading for the workshop.

Appelbaum, M., Cooper, H., Kline, R. B., Mayo-Wilson, E., Nezu, A. M., & Raine, K. (2018). Journal article reporting standards for quantitative research in psychology: Guidelines and APA Publications and Communications Board task force report. *American Psychologist*, 73, 3-25. <https://doi.org/10.1037/amp0000191>

Gernsbacher, M. A. (2018). Writing empirical articles: Transparency, reproducibility, clarity, and memorability. *Advances in Methods and Practices in Psychological Science*, 1(3), 403-414. <https://doi.org/10.1177/2515245918754444>

Overview of Today

- Qualtrics Set Up [5:00 until 5:40]
- Review [5:40 until 6:00]
- Data Analysis Practice [6:10 until 7:00]
- Advanced Analyses [7:10 until 7:45]
